## **Public Meeting on Colorado Dam Safety and Boating Improvements**

A public open house will be held to review the final draft "Colorado Street Dam Safety and Boating Improvements" report on October 29th from 5:30 - 7pm at the BPRD Community Room, 799 SW Columbia Street. District staff and the consultant, Recreation Engineering and Planning, will be on hand to show the various options considered in the draft report. All of the considered options maintain the pond water level above the dam while modifying the dam structure and the pedestrian bridge that lies on top of it. To read the full details of the report visit [www.bendparksandrec.org](http://www.bendparksandrec.org). If you have any questions or comments on the Colorado Dam Report or its findings or are unable to attend the open house, contact Bruce Ronning at 541-706-6113. You may also send written comments to: [ColoradoDamReport@bendparksandrec.org](mailto:ColoradoDamReport@bendparksandrec.org).

**For more information contact Bruce Ronning, Director of Planning & Development at 706-6113.**
